

Sai Rukshith Kalaganuri

Results-driven Solution Developer with over a 2 years of experience in application maintenance, incident management, and change management. Proficient in Python, SQL, and Linux, with a strong focus on optimizing system performance. Skilled in data preprocessing, exploratory data analysis (EDA), and implementing machine learning models to solve real-world business challenges. Adept at collaborating with cross-functional teams to ensure SLA adherence and deliver high-quality solutions. Passionate about leveraging emerging technologies to drive innovation and efficiency.

WORK EXPERIENCE

Solution Developer Tata Technologies

08/2022 - Present

Pune

Achievements/Tasks

- Monitored client infrastructure and systems to identify and resolve incidents, ensuring 100% availability proactively.
- Investigated and resolved 50+ incidents monthly using tools like BMC Remedy, Putty, and Oracle SQL. Developed and implemented a code fix, reducing recurring incidents for critical issues to zero, significantly enhancing system stability.
- Collaborated closely with DBA and project teams to provide comprehensive application support. Contributed to developing new features and optimized application performance through efficient CronJob management.
- **Skills:** Linux, SQL
- **Tools :** BMC Remedy, JIRA, Putty, Oracle SQL, Open Text Hostexplorer

Intern

Highradius

08/2021 - 05/2022

Achievements/Tasks

- Contributed to a significant codebase migration project for a new Treasury Management system. Improved prediction accuracy for various datasets by 15% through advanced machine learning techniques.
- Processed and visualized data using Pandas and Matplotlib, providing actionable insights. Gained hands-on experience in Python, machine learning, and data handling within a fintech environment.
- **Skills:** Python, Pandas, NumPy, Matplotlib, Seaborn, Machine Learning.

EDUCATION

BE - Computer Science and Engineering Chandigarh University

05/2018 - 05/2022

CGPA : 7.27

Courses

- **Computer Fundamentals**
OS, DSA, DBMS, CN, JAVA, Python, ML
- **Maths Concepts**
Probability, Linear Algebra

SKILLS

Python

JAVA

SQL

LINUX

GIT

HTML

CSS/Bootstrap

JS

JIRA

BMC Remedy

Putty

Open Text Hostexplorer

PERSONAL PROJECTS

B2B Invoice Management System

- ML model that predicts the invoice clear date using Linear Regression.
- This predicts enables clients to strategically plan their business models.

Expenx Management

- Developed using concepts of Python - pandas , matplotlib.
- Created an Expense Management system with Python to track user expenses, providing data visualization and historical spending analysis. Enabled effective financial insights through automated summary reports and data management.

ACHIEVEMENTS

Spot Award - Tata Technologies

Diagnosed and resolved a high CPU utilization issue through advanced log analysis, preventing server downtime and ensuring system stability.

Internship Training - Highradius

Successfully completed training in Python, Excel, and machine learning concepts during the internship program.

2 - Year Academic Scholarship

Recognized for outstanding performance with a **96.1% score in intermediate studies** , awarded a merit-based scholarship.
